

**Butterfly**, edition of 28, chiarograph on paper, retail price \$1600 unframed, and \$2200 framed

## Introducing Chiarography

The Chiarograph is a fusion of traditional printmaking and the latest digital technology. The characteristic of the Chiarograph medium is unique: while each one has a pattern or part of an image that is repeated, the individual hand painting preparation results in a one of a kind print. Thus, no two prints are identical.

## The Art of GEORGE TSUI

**Painted Eyebrow**, edition of 28, chiarograph on paper retail price \$1600 unframed, and \$2200 framed

After twenty years in the New York art scene, American artist George Tsui set out on a creative journey into China in the pursuit of reaching the next level in his artistic career. The grand and splendid architecture of the forbidden city and the mysterious and sensual character of the Dun Huang cave were the immediate inspiration for the exquisite paintings George would create.
